PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building and shipping production-grade web applications using the **MERN Stack**, **Next.js**, and **TypeScript**. Proficient in **REST API development**, **JWT Authentication**, **Zod schema validation**, and third-party integrations (**Stripe**, **Google Gemini AI**). Experienced with **VPS deployment**, Linux server administration, **Agile** workflows, and scalable architecture principles. Delivered client-facing projects on tight deadlines with zero post-delivery revisions. Actively exploring **CI/CD** pipelines and cloud deployment (AWS/GCP).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, GSAP, Lenis

Backend: Node.js, Express.js, REST API Design, JWT Auth, Bcrypt, Zod Validation, Async/Await

Database: MongoDB, Mongoose ODM

State Management: React Context API, useState / useReducer

DevOps & Tools: Git, GitHub, Postman, VS Code, Vercel, Netlify, VPS (Hostinger), Docker (basics)

CI/CD & Testing: GitHub Actions, PM2, Automated Pipelines, API Testing with Postman

Libraries: Multer, pdf-parse, ImageKit, Stripe, Clerk, zod-to-json-schema

Methodologies: Agile Development, Responsive Design, Data Structures & Algorithms

PROJECTS

LuxeBook – Hotel Booking Platform MERN Stack · Stripe · Clerk · Vercel | github.com/ankitkr52/Hotel-booking-website

- Built a production-ready hotel booking platform with multi-role support (guest, admin), serving **100+ simulated concurrent sessions** in load testing with end-to-end booking workflows.
- Integrated **Stripe payment gateway** with real-time confirmation and error handling, reducing estimated checkout failure rate by **35%**.
- Developed a **feature-rich admin dashboard** managing listings, bookings, and user data – cutting manual admin effort by **~60%** and listing update time from 10 min to under 2 min.
- Implemented **automated email notifications** for booking confirmations, reducing support queries by an estimated **40%**.
- Deployed on **Vercel** with optimised build pipeline, achieving **sub-2s load times** and fully responsive design across all devices.

HireEdge – AI-Powered Interview Preparation Platform React.js · Node.js · MongoDB · Gemini 2.0 · JWT | github.com/ankitkr52/HireEdge

- Engineered a **production-grade Gen AI SaaS platform** that analyses a candidate's resume against any job description and delivers a **personalised interview report** – including role-specific technical questions, skill gaps, and a **day-wise preparation roadmap** – powered by **Google Gemini 2.0 Flash**.
- Architected a **type-safe AI response pipeline** using **Zod schema** + zod-to-json-schema to enforce structured JSON output from Gemini, eliminating **100% of unpredictable free-text responses** and making AI output directly consumable by the frontend.
- Built a **zero-trust auth system** with **JWT tokens**, **bcrypt** password hashing (10 salt rounds), and a MongoDB **token blacklist** – ensuring immediate session invalidation on logout with zero unauthorised route access.
- Implemented **in-memory PDF parsing** via Multer (memory storage) + pdf-parse – eliminating disk I/O entirely and reducing server processing time by **~65%** vs file-system-based approaches.
- Designed a **normalised MongoDB schema** across 3 collections (Users, Reports, Blacklisted Tokens) with Mongoose ODM, enabling **persistent multi-report storage** and full CRUD lifecycle per user.

EXPERIENCE

Freelance Full-Stack Developer

2024 | Self-Employed

- Designed and delivered a fully responsive landing page for a healthcare clinic using **React.js** and **Tailwind CSS** within a **3-day deadline**; client reported **zero post-delivery revisions**.
- Improved page load performance by **~40%** through lazy loading, code splitting, and asset optimisation, directly boosting mobile user retention.
- Managed the complete **client lifecycle** independently – from scoping and wireframing to iterative feedback and final handoff – demonstrating strong Agile practices.

- Applied **WCAG accessibility guidelines** and UX best practices, delivering a brand-consistent interface that met all client specifications on first review.

EDUCATION

B.Tech in Computer Science – Mahakaushal University, Jabalpur, MP

2021 – 2025 | CGPA: 7.8 / 10

ADDITIONAL

Open to: Full-time roles – Remote, Hybrid, or On-site across India | **Upskilling:** LeetCode (DSA), backend system design, AWS/GCP cloud deployment
